This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-6 (canceled).

1	7. (currently amended) A method for generating a
2	display presentation on a user computer, comprising the
3	steps of:
4	connecting a user computer to a web server over a
5	network;
6	validating said user computer;
7	accepting a web page request from said user
8	computer;
9	determining if said web page request is for
10	generating said display presentation;
11	executing a servlet corresponding to said web page
12	request if it was determined that said web page request
13	was for generating said display presentation;
14	retrieving an HTML template corresponding to said
15	executed servlet;
16	interpreting said HTML template including the steps
17	of:
18	retrieving retrieved data from a database
19	according to said servlet execution, said retrieved
20	data including:
21	survey data and normative data for
22	generating custom display presentations; and
23	descriptive data for labeling said display
24	presentation
25	stripping test data from said HTML template;

embedding some portion of said retrieved data 26 in said HTML template, wherein some further portion 27 of some portion of said retrieved data replaces said 28 stripped test data; 29 executing commands referenced in said HTML 30 template, said commands for generating a display web 31 page utilizing said retrieved data; 32 serving said display web page to said user 33 computer, said display web page for generating a 34 display presentation including a graphical diagram, 35 a table, or a multi-medial presentation on said user 36 37 computer.

Claim 8 (canceled).

9. (currently amended) A system for generating a 1 display presentation on a user computer, comprising the 2 steps of: 3 means for connecting a user computer to a web server 4 over a network; 5 means for validating said user computer; 6 means for accepting web page requests from said user 7 8 computer; means for determining if said web page request is 9 for generating said display presentation; 10 means for executing a servlet corresponding to said 11 web page request if it was determined that said web page 12 request was for generating said display presentation; 13 means for retrieving an HTML template corresponding 14 to said executed servlet; 15 means for interpreting said HTML template including: 16

means for retrieving retrieved data from a 17 database according to said servlet execution, said 18 retrieved data including: 19 survey data and normative data for 20 generating custom display presentations; and 21 descriptive data for labeling said display 22 presentation 23 means for stripping test data from said HTML 24 25 template; means for embedding some portion of said 26 retrieved data in said HTML template, wherein some 27 further portion of some portion of said retrieved 28 data replaces said stripped test data; 29 means for executing commands referenced in said 30 HTML template, said commands for generating a 31 display web page utilizing said retrieved data; 32 means for serving said display web page to said 33 user computer, said display web page for generating 34 a display presentation including a graphical 35 diagram, a table, or a multi-medial presentation on 36 37 said user computer. Claims 10-18 (canceled). 19. (currently amended) A method for generating a 1 display presentation on a user computer, comprising the 2 3 steps of: connecting a user computer to a web server over a 4 5 network; accepting a web page request from the user computer; 6 determining if said web page request is for 7 generating said display presentation; 8

9	executing a servlet corresponding to said web page
10	request if it was determined that said web page request
11	was for generating said display presentation;
12	retrieving an HTML template corresponding to said
13	<pre>executed servlet;</pre>
14	interpreting said HTML template including the steps
15	of:
16	retrieving retrieved data from a database
17	according to said servlet execution, said retrieved
18	data having:
19	survey data and normative data for
20	generating custom display presentations, and
21	descriptive data for labeling said display
22	<pre>presentation;</pre>
23	embedding some portion of said retrieved data
24	in said HTML template; and
25	executing at least one command referenced in
26	said HTML template, said at least one command for
27	generating a display web page utilizing said
28	retrieved data;
29	serving said display web page to the user computer,
30	said display web page for displaying a display
31	presentation of a previously conducted survey including a
32	graphical diagram, a table, or a multi-medial
33	presentation on the user computer;
34	serving at least one applet along with said web page
35	to the user computer; and
36	The method of claim-18, further comprising the step
37	of stripping test data from said HTML template, wherein
38	some further portion of some portion of said retrieved
39	data replaces said stripped test data, wherein

Appl. No. 09/992,126 Amdt. Dated November 8, 2004 Reply to Office action of May 7, 2004

```
40
         said displaying said display presentation on the
41
    user computer includes the step of executing said applet
42
    on the user computer, and wherein
43
         said at least one applet is a member of the group
44
    consisting of:
45
              graphing applets for generating graphical
46
         diagrams;
47
              table producing applets for generating tables;
48
         and
49
         multimedia applets for generating multimedia
50
    presentations; and further wherein said template
51
    comprises:
52
         title information;
53
         descriptive data for labeling said display
54
    presentation; and
55
         JavaScript code to communicate size and location
56
    information to said at least one applet for directing the
57
    formatting of said display presentation.
```

Claims 20-31 (canceled).
